

National Repeal Day

DECEMBER 5, 2017

Prohibition was instituted with the ratification of the 18th Amendment on January 16th, 1919, and then repealed with the 21st Amendment on December 5th, 1933 – but this didn't mean all U.S. cities were free to booze it up. Right here in Bentonville, we remained a dry county until November 6th, 2012. In honor of our release from Prohibition, please join us as we celebrate National Repeal Day. Today is a reminder of the rich traditions of craft fermentation and distillation, the legitimacy of the American bartender as a contributor to the culinary arts, and the responsible enjoyment of alcohol as a sacred social custom.
